

AMENDMENT TO SPECIFICATION

IN THE SPECIFICATION:

A marked-up copy of the changes to selected paragraph(s) is provided below.

Please enter these changes to the specification in the record.

Please replace the paragraph that begins on line 3 of page 1 of the specification as originally filed with the following paragraph:

The invention relates to a floor panel, according to the preamble of claim 1 (DE 102 24 540.1).

Please replace the paragraph that begins on line 3 of page 6 of the specification as originally filed with the following paragraph:

The milled relief 200, which starts from the top side 15, is designed such that it can accommodate the opposite profile, with the result that, on the one hand, the head surface 26 rests in a completely planar manner on the base surface 280 and, on the other hand, the surfaces 15 of the two panels 1, 2 in the installed state, as is illustrated in FIG. 2-[sic], terminate in a single plane and are positioned, as far as possible, flush one against the other. The recess 29 above the form-fitting element 24 creates a free space 290 which serves as a dust pocket, and the same applies to the free space 300, which is formed by corresponding positioning of the inner wall 210 of the milled relief 200.
